Baaske Medical

MediTouch BLT03 GER

Waterproof.
Luminous.

INCL. TOUCH-PAD

MediTouch BLT03 – Medical keyboard with integrated touchpad and backlight.

The all-rounder for low-light and darkened areas. The **Medi-Touch BLT03** keyboard is a simple mix of flat keys and a clinically white jacket. The keyboard also has a lot to offer from a technical point of view: The gradual backlighting can be individually adjusted to the given lighting conditions and can be switched off via a separate key if required. Completely sealed, the silicone keyboard can be immersed in liquids (IP68). The Tru-Lock mechanism also enables cleaning during operation. A special feature is the additional LED dot on the caps lock button. If this key is pressed, the LED lights up green and informs the user that the permanent changeover to the alternative keypad assignment is switched on. This is particularly helpful when entering passwords.

Benefits:
- Built-in touchpad
- Backlight adjustable
- Fully sealed (IP68)
- Disinfectable
- Excellent tactile feedback
- Quiet - noiseless keystroke
- LED point for switched on Caps Lock key
